DETAILED ACTION

Response to Amendment

Examiner acknowledges response by applicant's representative received 12/17/2002.

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 U.S.C. § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/208,696

Art Unit: 3711

1. Claims 11, 2-4, 6, 7 & 12-15 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sankyo K.K..

Sankyo discloses, as his invention, a Game Machine. In his slot machine he teaches a display that has 2 or more identical symbols appearing serially, as shown in the main figure of his invention.

Sankyo discloses the claimed (display) invention with the exception of the teaching of 2 or more identical special symbols in all three columns. It would be obvious to one of ordinary skill in the art at the time of the invention to duplicate the teaching of 2 or more identical special symbols shown in the right and left columns (drums) as shown in the aforementioned figure, since it has been broadly held that mere duplication of the essential working parts of a device involves only routine skill in the art.

Additionally, the serially appearing symbols of Sankyo's disclosure could be considered special for the purpose of this invention.

2. Claims 11, 2-4, 6, 7 & 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kimura in view of Sankyo K.K..

In addition the aforementioned teachings of Sankyo K.K., Kimura discloses a Game Machine With Selective Stop Means For Moving display. Kimura explicitly teaches spinning reels, symbols associated with the state of the game and reels controlled by the player (see abstract and claim 1).

It would be obvious to include the teaching of Sankyo K.K.'s reel design to the machine of Kimura. This modification would be considered a mere matter of design choice (since Sankyo K.K. implicitly teaches all the other features of a regular game machine) and would be recognized as being within the level of one of ordinary skill in the art.

Response to Arguments

In summary, applicant argues that the reference by Sankyo K.K. fails to disclose the claimed correlation between:

The preselected one of a plurality of symbols and the game state

Contrary to the aforementioned argument, Examiner feels that all symbols on game machines, via programs or otherwise, correlate with the game state of the specific machine that it is associated with. Sankyo K.K.'s game machine is no different with respect to this teaching.

Furthermore Kimura (a previously cited reference explicitly teaches the correlation of symbols and the game state.

 The discernability of the preselected one of the plurality of symbols and the rate of presentation of the symbols during the moving indication

It is inherent that reel/wheels of game machines or other such equipment move, turn or spin. The rate of presentation of the symbols thereon is relative to the rate of motion. The ability to view such symbols in motion will depend on who is viewing the reel/wheel in motion. Applicant

Application/Control Number: 09/208,696

Art Unit: 3711

argument as to why/how fast his reel spins and players response seems no different to the spinning of any other reel/wheel in game machines and players individual ability to respond to such.

 The actuatability of the player-actuatable stop arrangement in response to the discernment of the preselected one of the plurality of symbols

Examiner feels that this feature is well known in the art, however, it is explicitly shown in the reference to Kimura (see abstract and claim 1).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 09/208,696

Art Unit: 3711

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Olympia K.K., Murphy et al. and Hooker are cited to show the state of art with respect to features of the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to *Dolores R. Collins* whose telephone number is *(703)* 308-8352. The examiner can normally be reached on Monday through Friday from 8:00 a.m. to 4:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, *PAUL SEWELL*, can be reached on *(703) 308-2126*. The fax phone number for the organization where this application or proceeding is assigned is *(703) 305-3579*.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the *receptionist* whose telephone number is *(703)* 308-1148.
